Art Unit: 3744

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by international application WO 03/019085. The international application WO 03/019085 discloses a refrigerant cycle apparatus comprising a compressor with first A and second B compression elements, intermediate cooling circuit C, gas cooler E, throttling means J, and evaporator K. The temperature and pressure of the refrigerant at the suction 4 of the second compression element B is maintained in the gaseous state (i.e. no condensation of refrigerant) (see 4 of Figures 7 and 8).

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
